

## GREAT FIND

# Medicine helper

An easy way to make the medicine go down: Use **ReliaDose**. This ingenious bottle has a syringe inside for liquid meds. As your baby sucks her milk or juice, push the syringe to mix the liquids so she won't taste the medicine. No wonder it's so smart—a mom thought it up. (Blaine Pharmaceuticals, \$11; [reliadose.com](http://reliadose.com) for stores)
