

PediaSense™

# THE EASY & ACCURATE WAY TO GIVE MEDICINE TO YOUR BABY

# ReliaDose®

## Medicine Delivery System

ReliaDose® is specifically designed to work with a child's natural desire to feed from a bottle while ensuring complete and gentle dosing of medication. The dual-chamber nipple allows medication to be passed directly into the baby's mouth through the inner chamber of the nipple, while the outer chamber delivers formula or juice, surrounding and masking the taste of the medicine. The inner syringe ensures dosing accuracy.

Recommended for babies 0-18 months  
DISHWASHER SAFE
