

Date:

Dear Retailer,

I am disappointed that I couldn't find the ReliaDose[®] Medicine Delivery System on your store shelves today. Please consider stocking this product, as it is a solution for mothers frustrated with the available options to facilitate giving liquid medication to babies.

ReliaDose[®] utilizes a patented dual-chamber nipple that delivers medicine through an inner chamber directly to the infant as he drinks from the bottle. This is ideal, since it masks the taste of the medicine and allows for a less stressful dosing experience. More importantly, this dual-chamber nipple prevents the medication from mixing with the baby's drink and improves the accuracy and dosing effectiveness, which ultimately leads to a healthier baby. Contact phone number for ReliaDose[®] Medicine Delivery System is 859-344-9600.

Please consider my request. I am sure many consumers would benefit from this product as well.

Sincerely,

Name
